SUMMER EDITION

AUGUST 2013

## President's Message

FACERS President 2013/2014  
Ryan Douglass, Walton County

I see it as a great honor to serve as President for FACERS for the 2013-14 year. I want to thank everyone for their support and look forward to working together in this organization.

The 2013 FACERS Annual Conference was a great success. We documented some of the highest attendance numbers in the history of the organization. The technical presentations along with all of the round-table communication were both effective and informative along with providing needed continuing education units. I want to say a special **thank you** to Amy Blaida (RS&H) for coordinating the FACERS Social at Jackson's Bistro on Harbour Island and a **thank you** to the rest of our faithful sponsors. The social was attended by a record number of FACERS members and sponsors, well over 80 people. We are also proud to note the growing number of municipal attendees.

Save the date for the upcoming **2013-14 FAC Legislative Conference on November 13 - 15**. Judy Grim has begun assembly of a top notch FACERS agenda that will coincide seamlessly with the FAC agenda. The conference is being held at the beautiful Hilton Daytona Beach in Volusia County. Hotel registration information is expected to be released in September.

Make plans to attend the **2014 NACE Conference being held in Baton Rouge, Louisiana, April 13 – 17, 2014**. It is important that we have a large contingent at this conference as we will be manning a booth and distributing information about the 2015 NACE Conference in Florida.

At our recent FACERS Board of Directors meeting, Chris Evers provided an exciting update regarding the **2015 Joint NACE and APWA-FL Annual Conference being held in none-other-than sunny Daytona Beach on April 19-23, 2015**. This is a great opportunity to coordinate two important national organizations. He provided a sneak peak of the preliminary agenda that promises to be a homerun.

Keep your ear to the pavement for future updates regarding any of the above items and future FACERS highlights.

## FACERS MEMBER SPOTLIGHT

John Angiulli, Public Works Director, Volusia County

John has been a resident of Volusia County for 28 years. He moved to Volusia County in 1985 and was employed by General Electric as a Program Support Engineer. GE sold the Simulation and Controls Division to Lockheed Martin in 1993 and rather than move to Orlando or commute John took a position with Volusia County in August 1994 as an Administrative Assistant II in the Community Assistance Division to administer Federal grant programs.

In July 2004, John was promoted to Public Works Operations Manager where he worked for Mary Anne Connors and George Recktenwald, both former Volusia County Public Works Director's.

John served as Interim Public Works Director from December 2011 until January 2013 when he was confirmed as Volusia County's Public Works Director.

John attended the University Of Central Florida where he received a Bachelor degree in Business Administration 1977.

Volusia County will be hosting the FAC/ FACERS 2013 Legislative Conference as well as the Joint NACE/FACERS/APWA 2015 Conference!

## FACERS MISSION

**The Florida Association of County Engineers and Road Superintendents (FACERS) is entrusted by professional obligation to monitor and offer opinions on related local, state and national legislation affecting transportation and public works; to contribute to the development or revision of statewide standard specifications and guideline documents; and to provide a forum for the exchange of ideas, technical information and best practices to assure every community of the best possible engineering available.**

# FACERS 2013 AWARDS

**Public Works Employee:  
Sharon Strout, Senior Crew Leader  
Hillsborough County**

## **Annual FY'12 Bridge Repair Program**

In the 2012 fiscal year, Ms. Sharon Strout and her Bridge Team completed 32 projects, including important safety improvements to local bridges, guard rails, pedestrian bridges, and fences. Ms. Strout led the team in implementing various methods to develop a system for cleaning and sealing bridge decks while maintaining continuous traffic flow over the bridges. This innovative system worked so well that it will be carried forward into future projects. As Senior Crew Leader, Sharon works closely with her team to devise structural solutions for problems reported by public works staff, other county departments, other agencies, and the general public. When Robert Suess, director of the Hillsborough County Transportation Maintenance and Public Works Department, visited a construction site where Sharon was leading a crew of eight concrete-spattered crewmen standing under a bridge up to their ankles in water, he was impressed by her experience and ability to command their attention and gain trust. Mr. Suess praised Sharon for her innate sense of engineering judgment, amazing understanding of construction technology, and natural leadership characteristics important for her key supervisory role. Under her guidance, the Bridge Team has consistently run a successful method of operation for maintaining and rehabilitating the county's inventory of over 250 bridges. While she would be eager to give the credit to her crew, FACERS is proud to present the Public Works Employee of the Year award to Sharon Strout. Thank you and congratulations on a job well done!

# FACERS 2013 AWARDS

**Urban Engineer of the Year:  
John Philip Denninghoff, Director  
Brevard County Public Works De-  
partment**

## **A. Max Brewer Bridge Replace- ment & Fishing Pier, Titusville, Florida**

John Denninghoff is well liked and trusted among his peers. He is respected for his in-depth knowledge in many areas and is considered a “go-to guy” for all things Public Works. As director of the Brevard County Public Works Department, Mr. Denninghoff coordinated many government agencies to replace the ageing A. Max Brewer Swing Span, the longest in Florida, with a Hi-Rise concrete span over the Indian River Lagoon. Once the project was complete, John worked with the City of Titusville and local private firms to spread the word that the bridge was in the race for the People’s Choice Award, a national contest sponsored by the American Association of State Highway and Transportation Officials. His efforts paid off, as the State of Florida took first in the nation out of the ten states that entered, receiving nearly half of the overall votes in a tight competition with California. The bridge now serves the community as an important connection between the City of Titusville and Merritt Island, allowing easy access to local attractions, such as the Kennedy Space Center and recreational fishing. For his outstanding work on this award-winning project and his continued service to his department, FACERS is proud to present the Urban Engineer of the Year award to John Philip Denninghoff. Thank you and congratulations on a job well done!

# FACERS 2013 AWARDS

## **Small Agency/Rural Engineer of the Year:**

**Becky Hiers, Engineer III  
Nassau County Public Works**

### **Closure of West Nassau Landfill**

Construction to cap and close the 53 acre West Nassau Landfill began on July of 2011 and the majority of the work was completed by December of 2012. Construction was impacted by Tropical Storms Beryl and Debby, which caused extensive damage to the construction site. Ms. Becky Hiers oversaw not only the recovery of the site from the storms but also the day to day construction. Additionally, Ms. Hiers continued to oversee the implementation of the Inward Gradient process at the landfill as well as myriad other FDEP reporting and monitoring responsibilities, as well as managing the Consultant Contract for the landfill. The project was brought in on time and under budget by \$92,500, even after dealing with the tropical storm damage and claims from the contractor, allowing for additional time for the Solid Waste and Recycling Department to operate on the Solid Waste Trust Fund and with lower valorem revenues. While Becky did not have an extensive background in solid waste and had only been with Nassau County for a short time, her successful management of this project is a testament to her leadership skills, willingness to take on new tasks, and ability to handle the necessary arrangements to see projects through to completion. In light of these qualities, FACERS is proud to present the Small Agency/Rural Engineer of the Year award to Becky Hiers. Thank you and congratulations on a job well done!

# FACERS 2013 AWARDS

## Local/State Collaboration: Miami-Dade Transit

### AirportLink

On July 28, 2012, Miami-Dade Transit officially opened AirportLink to the public. AirportLink is a 2.4 mile elevated Metrorail extension from the existing Earlington Heights

Metrorail station to the new Miami International Airport Metrorail station, a multi-level station featuring lush landscaping, an entry plaza, and other passenger amenities, such as art work and special lighting. Providing livable, pedestrian-friendly, transit-oriented station areas is paramount to encourage new riders and to reduce dependence on automobile trips. With this goal in mind, the station was planned using an innovative, column-free design for an open, airy feel, skylights in the roof canopy to allow natural light in during the day, and a reflective roof that keeps the area cooler. The use of Fiber Reinforced Polymer bars on all plinth pads of the guideway will lengthen the life of the decks.

AirportLink is considered the centerpiece of the People's Transportation Plan, a comprehensive transportation improvement plan that includes both roadway and transit-improvement projects. This new connection has provided a boost to the local economy by creating jobs and facilitating work-related travel, reducing greenhouse gas emissions, and improving travel time by taking vehicles off the roadways. The team at Miami-Dade Transit communicated their schedule, budget, safety, and quality goals to all stakeholders from the very beginning of the project. The team, along with stakeholders and upper management, held weekly progress meetings to address any issues that could impact schedule or revenue operations. The project was funded by \$404.7 million from the PTP half-penny sales surtax and \$101.3 million from the Florida Department of Transportation. Completed on time and on budget, the project is a milestone achievement for the County, and FACERS is proud to present the Local/State Collaboration of the Year award to Miami-Dade Transit. Thank you and congratulations on a job well done !

## **Team Project Hillsborough County's Public Works Department-Systems Planning Sec- tion**

### **Cultural Change and Process Im- provement**

In late 2010, the Transportation Maintenance Division of the Hillsborough County Public Works Department embarked on a two-phase project of cultural change and process improvement. This ongoing project was initiated to identify opportunities to improve operational efficiencies and re-engineer processes to maximize the effectiveness of the functioning elements of the division .

The first phase identified possible improvements to the planning, organizing, directing, and controlling operations. Phase two focused on implementing the rec-

# FACERS 2013 AWARDS

ommendations discovered in phase one, such as selecting a systems tool to automate asset and work management processes. The team also implemented a systematic data-gathering process, began using condition assessments technology, and employed the latest business practices to optimize division operations. As a result, the TMD now receives fewer complaints and is able to more efficiently serve the public. The changes toward continuous improvement and efficiency have also eliminated work backlog and saved millions of dollars by reducing the resources needed to carry out division operations.

Throughout the improvement process, the team realized that technology and automation are important tools for measuring efficiency and effectiveness. The team applied data to create a culture of accountability, continuous improvement, and positive change. The significant progress was accomplished through the leadership and commitment of Senior Management, the guidance of the Systems Planning Manager, and the hard work and dedication of the members of the Systems Planning group. For these efforts towards improved service and continuous growth, FACERS is proud to present the Team Project of the Year to the Hillsborough County Public Works Department Systems Planning Section. Thank you and congratulations on a job well done!

# save the date

FACERS will hold its 2013 Legislative Meeting in conjunction with the FAC (Florida Association of Counties) Legislative Conference on **November 13-15 in Daytona Beach, Florida (Volusia County).**

There is NO registration necessary if you plan to only attend the FACERS sessions; however, if you attend any of the FAC sessions or social events, you must register at the FAC website: [www.fl-counties.com](http://www.fl-counties.com)

Hotel and FAC Registration will be available September 2013.

## FACERS Tentative Schedule

- **Wednesday, 11/13:**  
9am-5pm: presentations (CEUs provided)
- **Thursday, 11/14:**  
9am-5pm: presentations (CEUs provided)  
6pm-9pm: FACERS Social (RSVP required)
- **Friday, 11/15:**  
9am– noon: FACERS Business Meeting

\*\*\*FACERS will offer CEUs free of charge for all of the presentations on Wednesday and Thursday.

\*\*\*A detailed schedule of FACERS presentations will be available October 2013.

### BATON ROUGE

APRIL 13-17, 2014

With the **Country's Largest County Infrastructure Exhibits Show** and over 75 presentations, **NACE 2014** will give you everything you need today to prepare for tomorrow's challenges. Experience a program that will deliver invaluable, first-hand insight from industry experts, ideas from county engineer peers, and solutions to help you manage projects more efficiently and cost effectively. You'll learn about the latest techniques and software to help you with bridge construction, pavement surfacing and preservation, fleet maintenance, safety plans and more. Plus specific sessions will focus on Federal initiatives that directly impact locals.

## 2015 JOINT NACE/FACERS CONFERENCE WITH APWA FL!

April 13-17, 2015

Hilton Daytona Beach, FL

Over the last few months APWA and NACE have been busy inking a deal to combine our respective conferences. The genesis of the effort began early in 2013 as we both began planning for Daytona. Our conferences were set to be a week apart. Rather than cannibalize off each other we decided to join forces. Both associations voted unanimously to support the effort. With the contracts waiting to be signed and lots of work to be done, the exciting part is yet to come.

NACE, FACERS and APWA have long been allies. Now the two groups will have a close working relationship as we begin the task of putting this massive show together. Here's a brief primer on the different aspects of the show. The exhibit show will feature a combined floor. All technical sessions will also be combined in addition to joint general sessions and keynote speaker. The special event night will merge the two organizations with all of the exhibitors and sponsors. Each organization will have their own awards banquet. NACE will also hold a few of their own events. Each organization will also maintain their own registration.

The next step in this endeavor is the "Memorandum of Understanding" signed by both associations. This document will highlight the revenue and expense sharing and the other details that need to still be worked out. After this is completed the two groups will begin in earnest to plan this landmark Conference.

An event of this magnitude is impossible to pull off without the support and hard work from the members of these great organizations. We encourage you to step up to the plate and ask how you can be involved in 2015. Thank you!

*Chris Evers, APWA FL Immediate Past President*

## **FACERS PROJECT SPOTLIGHT: CITY OF CAPE CORAL—Bridge Replacement Project**

**by Chris Camp, City of Cape Coral Maintenance Division Manager, Public Works Dept.**

In March and April of 2013, our Public Works Maintenance Division staff completed bridge replacement project on N.W. 36th Avenue at N.W. 42nd Terrace in Cape Coral, Florida.

Throughout the years, the Public Works Department's Maintenance Division has done an outstanding job of repairing bridges and replacing storm pipes throughout the City. Given the skills of the various maintenance crews, supervisory staff, and specialized equipment at their disposal, it seemed as if significant general fund money could be saved by performing the bridge replacement project in-house vs. using outside contractors.

This project included a tremen-

dous amount of planning and construction work that the Maintenance Division personnel are not normally involved with on a daily basis, or even on their capital improvement projects. The old bridge (pavement, guardrails, storm pipes, etc.) had to be completely removed to make the requisite improvements. In order to accomplish this, dikes were installed on either side of the structure, and the Overhold Canal was pumped out to expose the canal bed. The four badly damaged and degraded sixty-one foot long 66" diameter steel storm pipes were replaced with 60" ADS pipe, which has a life expectancy of 100 years. The existing concrete stem walls of the bridge, and the guardrails were the only parts of the previous structure that were salvaged in the project. A total of 1500 cubic yards of fill dirt and 200 tons of stone were also used to rebuild this

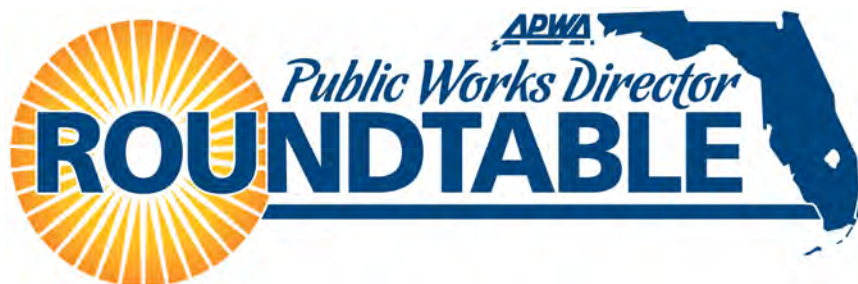

## FACERS PROJECT SPOTLIGHT continued: CITY OF CAPE CORAL—Bridge Replacement Project

bridge, and layered compaction was performed to meet Florida Department of Transportation standards. New pavement was laid to match the road elevation prior to construction. By utilizing our highly skilled city employees and specialized in-house equipment, this project was completed with the installation of four new pipes at a cost of \$54,783.00 which is approximately \$38,000 less than an outside contractor proposed for relining the existing pipes for this project.

Being a Public Works Director in today's challenging times is a difficult feat. Unprecedented budget constraints plus a contentious political environment and a historically under funded infrastructure is not exactly a recipe for success. The position doesn't come with an instruction book either. Last year the APWA Florida Chapter launched a new initiative called the Public Works Director Roundtable. The mission of the Roundtable is to provide Public Works Directors (PWD's) across Florida a network of peers to ask questions, share success, get advice and spread knowledge regarding all facets of the PWD role.

This new program is open to all Directors of any City or County in Florida no matter the size. You don't even have to be a member of APWA to participate. The Chapter also includes the City or County Engineer in Roundtable events. Each year at the Florida Chapter's Annual Meeting and Trade Show, PWD's from across the State come together to participate in the Roundtable. In addition throughout the year the different APWA Branches hold regional Roundtables.

On April 25<sup>th</sup> 2013, at the Florida Chapter's Annual Meeting and Trade Show in Jacksonville, over 50 Director's gathered for the Second Annual Roundtable to discuss the issues facing Public Works. Many FACERS members were present as well and the spirited discussion ranged from funding, advocacy, pavement management, Stormwater and many others. Since inception, this program has assisted Public Works Directors in developing media materials to aid in educating elected officials and citizens, developed a service industry survey for Public Works Directors to participate in, and discussed partnership efforts to make all departments more effective in providing services. This year to celebrate National Public Works Week, APWA provided an educational video to every PWD in addition to an intro video to air on local access TV channels and each Departments website and social media sites.

Over the last few months APWA also began distributing the comprehensive **2013 Florida Public Works Snapshot Survey** which helps each Director benchmark their respective departments and provide useful information to management, elected officials and citizens. This effort is the first of its kind and upon completion the results will be shared with the Roundtable.

*If you would like to know more about a Public Works Director Roundtable in your area, or to participate in the Snapshot Survey please contact Chris Evers at [chrise@apwaflorida.org](mailto:chrise@apwaflorida.org) or by phone at (727) 638-1699.*

## FACERS Membership

FACERS accepts membership applications for the following categories: Active, Municipal and Sustaining. You can join FACERS at this link : [FACERS Membership](#). As a member of FACERS, you will receive regular communications via email, the Quarterly FACERS Newsletter, and you will have the ability to attend the FACERS Annual Meeting and FACERS Annual Legislative Meeting (including the FACERS Social Nights) at NO COST.

### **Member Type Descriptions:**

**Government employees receive 1st year of membership for FREE!!**

*Active* - County Engineers, Public Works Directors, County Road Superintendents, etc., who are regularly employed on a full time basis by any one of the Counties of the State of Florida.

*Municipal* - City Engineers, City Public Works Directors, City Road Superintendents, etc., who are regularly employed on a full time basis by any one of the Cities of the State of Florida.

*Sustaining* - All other persons who are interested in the affairs of FACERS.

**\*Select your Fee Type (All FACERS Members can also register as NACE members):**

### **Explanation of fees**

- ◇ **FACERS (public agency employees/Active & Municipal Members) - \$75**
- ◇ **FACERS (non public agency employees/Sustaining Members) - \$125**
- ◇ **NACE (National Association of County Engineers) - \$150**

**After your registration is complete, please send your check to:**

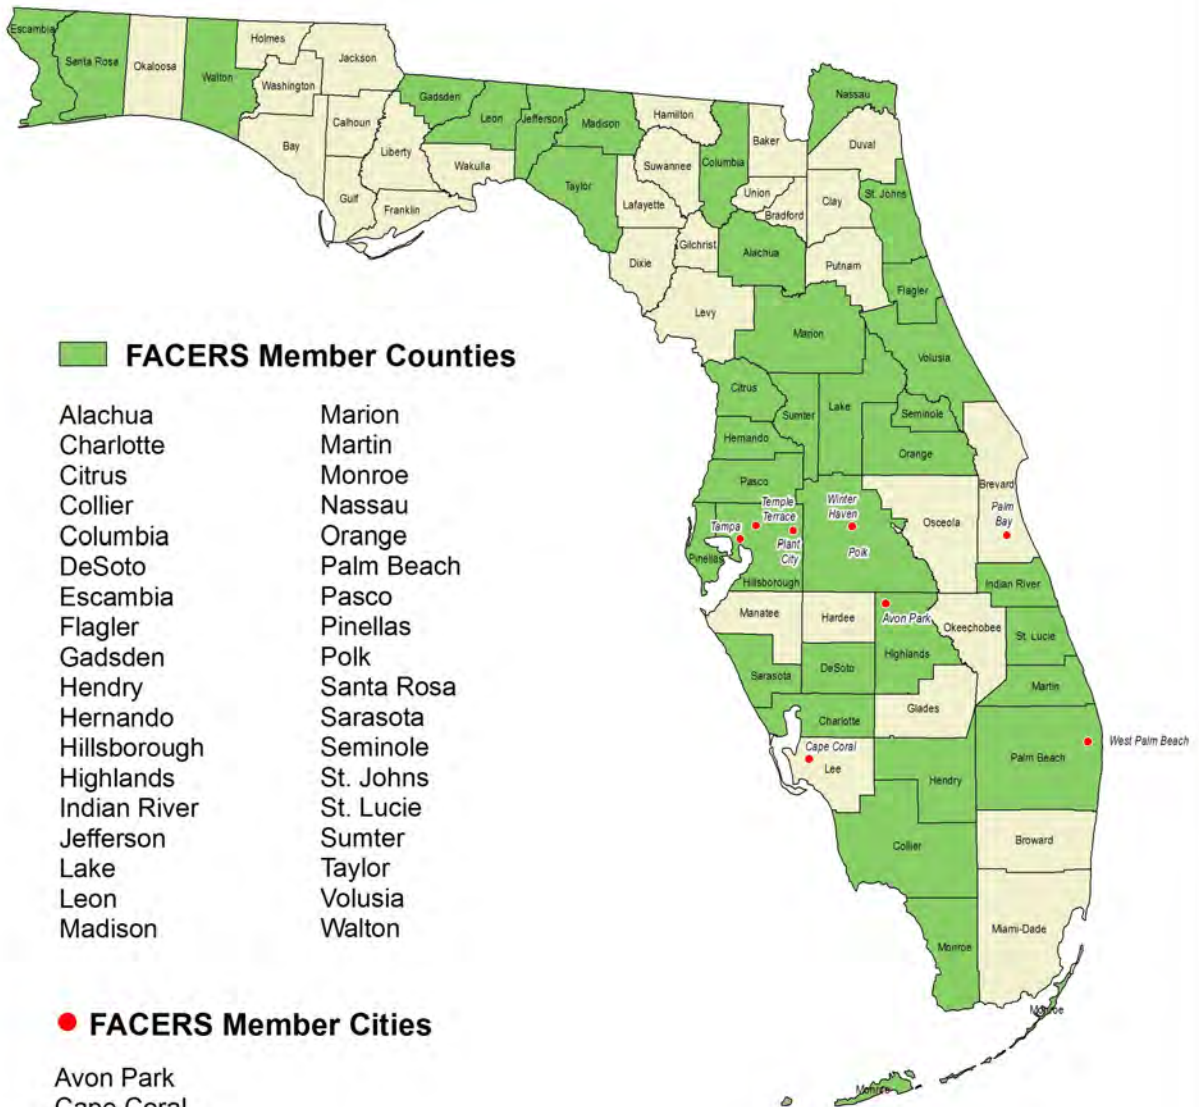

**Make checks payable to "FACERS"**

Jim Harriott  
FACERS Treasurer

## Florida Association of County Engineers and Road Superintendents

### 2013 Membership

**University of Florida Transportation Institute (UFTI)**  
**Director of Florida Transportation Technology Transfer (T2) Center**  
<http://jobs.ufl.edu> Requisition Number 0903738

The University of Florida Transportation Institute (UFTI), housed in the College of Engineering is soliciting applications for Director of the Florida Transportation Technology Transfer (T2) Center. The individual is responsible for directing and over-seeing all Center administrative and operational functions and its staff as well as planning for future Center growth.

The appointment will be at the Education/Training Programs, ASO DIR 5 level based upon qualifications and experience. The salary and benefits package are competitive. This is a TEAMS appointment reporting to the director of the UFTI.

**Duties and Responsibilities:**

- ◇ Provide leadership for / oversight of all internal / external Center functions (trainings, courses, classes, and certification programs); oversee \$2M projected annual budget and maintain / improve financial stability to ensure Center growth; aggressively explore / secure / execute new funding opportunities through partnerships / grants / existing relationships locally, statewide, nationally, and internationally, to support Center; supervise 15 – 20 highly motivational staff members.
- ◇ Co-ordinate research-results dissemination, workforce development projects, and continuing education efforts with the UFTI, the Transportation Research Center (TRC), McTrans Center, and the Southeast Transportation Research Innovation Development and Education (STRIDE) Center, the Regional University Transportation Center (UTC) for the southeast housed at University of Florida; work with all UFTI centers / units to explore new opportunities and build new programs in transportation technology transfer and workforce development; lead well-established, dynamic T2 Center programs (grant driven and revenue-supported) such as the Local Technical Assistance Program (LTAP), the Center for Transportation Training (CTT), Florida's Pedestrian and Bicycling Safety Resource Center, the Florida Occupant Protection Resource Center.
- ◇ Develop innovative technology transfer and continuing education strategies to address state-, national- and international- needs and opportunities; build on documented history of success interfacing / facilitating conferences (5 international conferences since 1992; 31 national showcase events featuring market-ready technology transfer for FHWA since 1998; more than 200 Florida sessions for over 2,200 trainees in 2012).

- ◇ Represent T2 Center at highest level of interaction and actively participate in local / state / national / international transportation organizations [Florida Association of County Engineers and Road Superintendents (FACERS), Florida Chapter of the American Public Works Association (APWA), Local Technical Assistance Programs and Tribal Technical Assistance Programs (LTAP/TTAP), Institute of Transportation Engineers (ITE), National Association of County Engineers (NACE), Transportation Research Board (TRB), Intelligent Transportation Society (ITS) Florida].

### **Qualifications:**

Applicants must possess a Master's degree in an appropriate area of specialization and four years of appropriate experience; or a bachelor's degree in an appropriate area of specialization and six years of appropriate experience working in a transportation-related field. Professional Engineer license is highly desirable. Experience in interacting with local governments and/or state/federal transportation decision makers is essential. Prior management and leadership experience, expertise in training/outreach activities, and excellent organizational skills are highly preferred.

### **Procedures and Deadlines:**

Applicants are required to apply through the University of Florida's Job Posting site at <http://jobs.ufl.edu> (Requisition Number is 0903738). Individuals must include a cover letter detailing their vision for the T2 Center, Curriculum Vitae, and the names and contact information for three references. The position will remain open until September 17, 2013. Review of applications will begin on September 6, 2013.

Additional information regarding the T2 Center is provided at [www.t2ctt.ce.ufl.edu](http://www.t2ctt.ce.ufl.edu), while information regarding the TRC is provided at [trc.ce.ufl.edu](http://trc.ce.ufl.edu). Questions about this position may be submitted to Dr. Lily Elefteriadou, Director, University of Florida Transportation Institute (UFTI), University of Florida, 365 Weil Hall, P.O. Box 116580, Gainesville, FL 32611-6580 (Email: [elefter@ce.ufl.edu](mailto:elefter@ce.ufl.edu)).

The University of Florida is an equal opportunity employer. Women and minorities are encouraged to apply. The "government in the sunshine" laws of Florida require that all documents relating to the search process, including letters of application/nomination and reference, be available for public inspection. If an accommodation due to a disability is needed to apply for this position, please call (352) 392-2HRS or the Florida Relay System at (800) 955-8771 (TDD).

Visit [t2ctt.ce.ufl.edu](http://t2ctt.ce.ufl.edu) to view the full course listings or to register for any of our sessions. To get in touch with someone about T2 workshops, email [t2workshops@ce.ufl.edu](mailto:t2workshops@ce.ufl.edu) or call 352.273.1670. For CTQP courses, email [ctt@ce.ufl.edu](mailto:ctt@ce.ufl.edu) or call 352.273.1669. We look forward to serving you. Training on *your* terms.
